561320 – Temporary Staffing Services

COMPANY OVERVIEW

SIA Design Services LLC is an Engineering & Design services vendor based out of Denver, CO. Providing turn-key solutions for mid-scale projects, and all manner of Engineering & Design work.

- SIA specializes in utilizing highly qualified personnel for specific project scope.
- SIA champions effective software use – keeping costs low and non-scope change orders to an absolute minimum.
- SIA serves clients who operate in all 50 states.

CORE COMPETENCIES

SIA Design Services is a software centric design company, that leverages efficient software use into significant cost savings for our clients.

Design/Drafting Services – Piping and Structural design represents a significant element of asset upgrades, repairs & maintenance. Our clients recognize the value of efficient software use. SIA has a history of creating data-centric, spec-driven models in a 3D CAD environment. Our projects remain within budget, even when non-scope design changes occur.

As-Founding/Inspection/Drone Surveying – Optimizing assets includes having an active-view of their current conditions, and preparing for effective engagement when the time is right. A new service SIA offers is inspections/as-found aerial photos using high tech drones. Drone use can save considerable labor costs with regard to inspecting existing assets, it's also very quick!

CAD Training/Technical Writing – SIA can teach other CAD Operators effective software use. Various procedure writings are used in-house, to aid employees in your company with complex tasks and or document creation as they work in CAD, increasing productive working time in each department. SIA can also create completely customized software presentations to address systematic mistakes in modeling and document creation.

DIFFERENTIATORS

- American owned small business delivering best-in-industry solutions
- Exceptional client and customer service spearheaded by quick response time
- Stunning 3D model walk-throughs give ample time for stakeholders to opine on design solutions
